Experiment - 5

Student Name: Tanisha Kumari

Branch: BE-CSE

Semester: 5th

Subject Name: Project Based Learning in Java

Subject Code: 23CSH-304

UID: 23BCS12542

Section/Group: KRG-2B

Date of Performance: 24/9/25

Aim: Create a menu-based Java application with the following options. 1. Add an Employee
2. Display All 3. Exit If option 1 is selected, the application should gather details of the employee like employee name, employee id, designation and salary and store it in a file. If option 2 is selected, the application should display all the employee details. If option 3 is selected the application should exit.

Objective: To combine object-oriented programming, file handling, and menu-driven console interaction.

Procedure:

1. Present a menu:

- a) Add Employee
- b) Display All
- c) Exit

2. On choosing Add, take input for:

- a) Employee Name
- b) Employee ID
- c) Designation
- d) Salary

3. Write this data to a file.

4. On choosing Display, read and display all employee data from the file.

5. Exit on selection of option 3.

Sample Output -

Menu:

- 1. Add Employee
- 2. Display All
- 3. Exit

```
                case 3:
                    System.out.println("Exiting...");
                    System.exit(0);
                    break;
                default:
                    System.out.println("Invalid choice! Try again.");
            }
        }
    }

    private static void addEmployee() {
        System.out.print("Name: ");
        String name = sc.nextLine();
        System.out.print("ID: ");
        String id = sc.nextLine();
        System.out.print("Designation: ");
        String designation = sc.nextLine();
        System.out.print("Salary: ");
        double salary = sc.nextDouble();
        sc.nextLine(); // consume newline

        Employee emp = new Employee(name, id, designation, salary);

        try (BufferedWriter bw = new BufferedWriter(new FileWriter(FILE_NAME, true)))
        {
            bw.write(emp.toFileString());
            bw.newLine();
            System.out.println("Employee added successfully!");
        } catch (IOException e) {
            System.out.println("Error writing to file.");
        }
    }

    private static void displayAll() {
        System.out.println("\nEmployee List:");
        try (BufferedReader br = new BufferedReader(new FileReader(FILE_NAME))) {
            String line;
            while ((line = br.readLine()) != null) {
                Employee emp = Employee.fromFileString(line);
                System.out.println(emp);
            }
        } catch (FileNotFoundException e) {
            System.out.println("No employees found.");
        } catch (IOException e) {
            System.out.println("Error reading file.");
        }
    }
}
```

Output -

```
input
Menu:
1. Add Employee
2. Display All Employees
3. Exit
Enter choice: 1
Name: Tanisha
ID: 12542
Designation: HR
Salary: 200000
Employee added successfully!

Menu:
1. Add Employee
2. Display All Employees
3. Exit
Enter choice: 2

Employee List:
Tanisha | 12542 | HR | 200000.0
```
